

ENVIRONMENTAL MANAGEMENT SYSTEM POLICY

The main activity of DRP Group Przemysław Miśkiewicz i Wspólnicy Sp. Jawna is the recovery and recycling of plastics, as well as the design and production of structural plastics composites. Our strategic goal in the field of environmental management is to conduct our operations in a sustainable manner, respecting the natural environment and meeting the expectations and requirements of interested parties.

We achieve the above goal by implementing and maintaining the Environmental Management System in accordance with the requirements of ISO 14001:2015, in particular by taking the following actions:

- compliance with applicable legal requirements, stakeholder requirements, compliance obligations and any other applicable requirements relevant to the context of the organization, affecting the organization ability to ensure compliance of the activities performed and relating to specific environmental aspects,
- implementation of production processes while maintaining the effective use of resources, materials and utilities, taking into account environmental aspects,
- minimizing the negative and nurturing the positive impact on the natural environment,
- engaging all employees of the company in maintaining and improving the Environmental Management System, properly communicating environmental goals, improving employee competences through systematic training,
- providing interested parties with access to information on the environmental impact of the Organization and solving environmental issues based on a joint dialogue,
- continuous improvement of the Environmental Management System, in particular by preventing breakdowns and environmental pollution and the sustainable use of resources in order to improve the environmental effects of operations.

We declare the provision of adequate resources to achieve environmental goals, as well as our commitment to maintaining and improving the implemented Environmental Management System in the field of activities related to the recovery and recycling and processing of plastics.
