

The quality policy is defined on the basis of an analysis of the context of the organization and the requirements of interested parties.

QUALITY POLICY

The implemented and maintained ISO 9001:2015 system is a confirmation that the delivered products and services are adapted to the growing and changing needs of the customer, and that the processes taking place in our company run in a planned and supervised manner.

The dynamic development of the company is realized through:

-  Conducting the recycling process using the experience and knowledge of the industry.
-  Increasing the scope of manufactured plastics, min. by designing composite composites offered under the brand of our own product line, meeting individual requirements and need of customers.
-  The use of research and laboratory facilities for:
 - control of parameters of plastics in accordance with the requirements,
 - carrying out external research and analysis.

The above goals will be achieved through:

- acquiring sources of raw materials and components, corresponding to the current needs and guaranteeing the availability of plastics from the product line,
- implementation of processes by a qualified and competent team, who knows and understands the goals and requirements,
- perception of applicable legal requirements, requirements of the client and interested parties, and any other requirements in order to ensure compliance of performed activities and increase client satisfaction,
- expansion of the machine park with modern devices and solutions,
- analysis of the existing condition and economic and financial results,
- consistent improvement of the Quality Management System and using it as a helpful tool in company management,
- effective advertising and promotion.

We undertake to provide the necessary resources for the proper functioning of the Quality Management System and declare our commitment to improving the Quality Management System and the implementation of the assumed goals in line with the strategic direction of the organization and the context of its operation.
